

BaseApp beta — shop onboarding guide

Welcome. This guide walks a new shop owner from first login to a working counter + chat channel.

Admin: <https://admin.baseapp.asia>

Support: reply to your BaseApp contact (or email the person who sent your login).

What you will set up

Step	Where	Who
1. Sign in	/login	Shop owner
2. Confirm shop name / country / currency	Profile → Settings	Shop owner (country change → ask BaseApp)
3. Add catalog (services / menu / products)	Profile → Services / Menu / Products	Shop owner
4. Add rooms & staff (<i>Health & Beauty</i>)	Profile → Rooms & staff	Shop owner
5. Connect LINE	Profile → Settings → LINE Messaging	Shop owner
6. Connect WhatsApp (<i>optional</i>)	Profile → Settings → WhatsApp	Shop owner (+ BaseApp for Flow publish)
7. Connect Grab Food (<i>F&B only</i>)	Settings / Orders	Shop owner
8. Run a test sale + booking	POS + Bookings / Orders	Shop owner

Language: top-right language switcher (EN / MS / ID / TH / ZH).

Before you start

You should have received from BaseApp:

1. **Login email** and **temporary password**
2. Your **shop type** (Health & Beauty, Food & Beverage, Retail, or General)
3. Your **country** (sets currency: MY → MYR, TH → THB, SG → SGD, ID → IDR)

If anything is wrong (wrong country, wrong category), ask BaseApp Master Admin to open **Vendors** → **Edit** and fix it before you add prices.

1. Sign in

1. Open <https://admin.baseapp.asia/login>
2. Enter your email + password → **Sign in**
3. You land on **POS**

Tip: Use a tablet or laptop in landscape. Pull down on most pages to refresh.

2. Quick tour

Top tabs (shop owner)

Tab	Purpose
POS	Walk-in sales / counter
Chat	LINE / WhatsApp inbox
Reports	Sales summary
Bookings	Appointments (<i>Health & Beauty / General</i>)
Orders	Grab / delivery queue (<i>F&B</i>)
Customers	Customer list (<i>Retail top tab; others via profile</i>)

Profile menu (avatar, top-right)

- **Overview** — today's snapshot
 - **Services / Menu / Products** — your catalog
 - **Rooms & staff** — artists, rooms (*H&B*)
 - **Settings** — shop name, LINE, WhatsApp, Grab
 - **Account** — your login profile
 - Language switcher sits beside the avatar
-

3. Confirm shop details

1. Profile → **Settings**
2. Check **Shop name** — edit if needed
3. Note **Country • currency** under the shop name (e.g. TH • THB)
4. Save when you change the name (**Save** / shop credentials form at the bottom of Settings)

Country and currency are set by BaseApp. Contact Master Admin to change them.

4. Upload your catalog (services / menu / products)

Open Profile → **Services**, **Menu**, or **Products** (label depends on shop type).

Health & Beauty (salon, tattoo, spa...)

1. Open **Services**
2. For each offering, fill:
 - **Name** (e.g. `Small line tattoo`)
 - **Category** (e.g. `Tattoo`, `Treatments`, `Add-ons`)
 - **Duration** (minutes)
 - **Price** (in your shop currency)
 - **Deposit** (optional; 0 if none)
3. Click **Save**
4. Repeat for packages and add-ons

Food & Beverage

1. Open **Menu**
2. Add each item: **Name**, **Category** (Food / Drinks / ...), **Price**
3. Optional: open **Customisations** on an item for modifiers (ice, size, toppings)
4. When Grab is connected later, use **Publish menu** from Settings / Menu tools

Retail

1. Open **Products**
2. Add each product: **Name**, **Category**, **Price**
3. Save — then sell from **POS**

Good first catalog size for beta: 5–15 items is enough to test. You can add more anytime.

5. Rooms & staff (Health & Beauty)

1. Profile → **Rooms & staff**
2. Add at least one **Artist / therapist** (e.g. your name)
3. Add at least one **Room / bay** if you use stations
4. These show up when you create bookings and on the day board

Skip this step for F&B and Retail.

6. Connect LINE (recommended for Thailand)

Customers message your Official Account; BaseApp can take bookings in chat (`menu` / `book`).

In LINE Developers

1. Open <https://developers.line.biz> → your provider → **Messaging API** channel
(or create a new Messaging API channel for the shop)
2. Copy:
 - **Channel ID**
 - **Channel secret**
 - **Channel access token** (long-lived — issue / copy from Messaging API tab)
3. Under Messaging API → **Webhook settings**:
 - Webhook URL: `https://api.baseapp.asia/v1/webhooks/line`
 - Enable webhook
 - Disable “Auto-reply messages” / greeting that fight the bot if you want BaseApp to own the chat (optional; ask BaseApp if unsure)

In BaseApp

1. Profile → **Settings**
2. Scroll to **LINE Messaging**
3. Paste **Channel ID**, **Channel secret**, **Channel access token**
4. Optional: **LIFF ID** if you use a LINE mini-app (booking also works by typing `menu` / `book` without LIFF)
5. Click **Save LINE only** (or save the full Settings form)
6. Confirm status shows token / secret **on file**

Smoke test

1. From a personal LINE account, add the shop OA and send: `menu` or `book`
2. You should get a package / booking flow reply
3. Open BaseApp → **Chat** — the conversation should appear

If nothing arrives: double-check webhook URL, that the webhook is **Enabled**, and that Channel ID / secret / token match the same channel.

7. Connect WhatsApp (optional)

Use this if you also want Meta WhatsApp booking + receipts.

1. Profile → **Settings** → **WhatsApp / Meta**

2. Copy into Meta Developer → WhatsApp → Configuration:

- **Callback URL**
- **Flows data endpoint**
- **Verify token**

3. Subscribe to `messages`

4. Paste into BaseApp:

- Display phone
- Phone number ID
- WhatsApp Business Account ID
- Permanent access token

5. Save settings

6. Ask BaseApp Master Admin to open your shop → **Meta** → **Publish booking Flow** (needed for the in-chat booking form)

Full Meta notes: `docs/WHATSAPP.md` .

8. Grab Food (F&B shops only)

1. Finish your **Menu** in BaseApp first
2. **Settings** → Grab panel → **Connect Grab**
3. Open the activation link Grab/BaseApp shows; complete outlet linking
4. Paste **Grab merchant ID** if prompted
5. **Publish menu**
6. New Grab orders appear under the **Orders** tab

Skip entirely for Health & Beauty / Retail beta unless you are F&B.

9. First day practice

A. Walk-in sale (everyone)

1. Open **POS**
2. Tap catalog items into the ticket
3. **Confirm order** / **Charge**
4. Choose customer (or walk-in) → **Cash** or **QR pay**
5. Finish — optional send receipt on WhatsApp if WA is connected

B. Appointment (Health & Beauty)

1. Open **Bookings** → **New**
2. Customer name + phone
3. Pick service, artist, room, start time → **Create booking**
4. On the day: mark paid / complete from the booking detail

C. Chat booking

1. Customer messages LINE (or WhatsApp) with **menu** / **book**
2. They pick package → date → time → confirm
3. You see it under **Bookings** and **Chat**

D. F&B order queue

1. Accept a Grab test order (or create a POS order)
2. **Orders** tab → Accept → Preparing → Ready → Complete

Day-to-day cheat sheet

Job	Go to
Sell at the counter	POS
See today's appointments	Bookings
Reply to customers	Chat
Add a new price / item	Profile → Services / Menu / Products
Change LINE / WhatsApp	Profile → Settings
Sales numbers	Reports
Customer list	Profile → Customers

Beta expectations (please read)

- Payments QR / pay links are **demo** / **sandbox-style** unless BaseApp told you otherwise — still practice the flow.
- Catalog editing is create-focused; ask BaseApp if you need bulk edits or deactivations.
- Country / currency / business category: Master Admin only (**Vendors** → **Edit**).
- LINE is the primary chat path for Thailand beta; WhatsApp is optional.
- Report anything confusing with a screenshot + what you tapped.

Appendix A — Master Admin: provision a beta shop

Do this **before** sending credentials to the merchant.

1. Sign in as Master Admin → **Vendors** → **Create vendor**
2. Set:
 - Shop name
 - **Industry** (category)
 - **Country** (locks currency + default timezone)
 - Owner name, email, temporary password
3. **Create vendor + owner login**
4. Optional: **Edit** to double-check country / category / active
5. Optional: **Meta** / **Grab** if you are pre-wiring channels for them
6. Send the merchant:
 - Admin URL: `https://admin.baseapp.asia`
 - Email + temp password
 - This guide (`docs/BETA_ONBOARDING.md`) or the in-app **Getting started** page
7. Use **View as** anytime to help them without their password

Appendix B — Suggested first-week checklist (merchant)

- ☐ Signed in successfully
- ☐ Shop name looks right; currency matches country
- ☐ At least 5 catalog items added
- ☐ (*H&B*) At least 1 artist (+ room if needed)
- ☐ LINE channel connected + `menu` test works
- ☐ One POS cash sale completed
- ☐ (*H&B*) One manual booking created
- ☐ (*Optional*) WhatsApp saved + Flow published by BaseApp
- ☐ (*F&B*) Grab connected + menu published
- ☐ Language set for staff who will use the tablet
