

Shop Onboarding Booklet

A complete setup guide for beta merchants — from first login to catalog, LINE, WhatsApp, Grab, and your first sale.

BaseApp

Shop Onboarding Booklet Beta Setup Guide

How to use this booklet

Work through the chapters in order on a tablet or laptop in landscape. Open the admin at <https://admin.baseapp.asia>. You can also open **Resources** in the admin to download this PDF and follow the same steps on screen.

8 Steps to Go Live with Confidence

Complete these essential steps to launch your shop smoothly and start selling.

- 2

Set Up Your Catalog
Add products, set prices, upload images, and organize categories.
- 3

Review Shop Settings
Configure shipping, payment methods, tax, and shop policies.
- 4

Preview Your Shop
Check how your shop looks on desktop and mobile. Test key pages.
- 5

Connect LINE Official Account
Link your LINE OA and enable chat for customer support.
- 6

Set Up LINE Automation (Optional)
Configure welcome messages and quick replies to assist customers.
- 7

Connect & Test POS
Connect your POS, sync products, and test transactions.

What you need from BaseApp first

1. Login **email** and temporary **password**
2. Shop type: Health & Beauty, Food & Beverage, Retail, or General
3. Country (sets currency: MY → MYR · TH → THB · SG → SGD · ID → IDR)

Wrong country or category? Ask BaseApp Master Admin to open Vendors → Edit before you add prices.

Setup map

#	Step	Where in admin	Who
1	Sign in	Login	Shop owner
2	Confirm shop name / currency	Settings	Shop owner
3	Add catalog	Services / Menu / Products	Shop owner
4	Rooms & staff (H&B)	Rooms & staff	Shop owner
5	Connect LINE	Settings → LINE	Shop owner
6	Connect WhatsApp (optional)	Settings → WhatsApp	Shop + BaseApp Flow publish
7	Grab Food (F&B only)	Settings → Grab	Shop owner
8	Practice POS + booking	POS / Bookings / Orders	Shop owner

Sign in to your shop

1. Open `https://admin.baseapp.asia/login`
2. Enter the email BaseApp sent you
3. Enter your temporary password
4. Tap **Sign in**
5. You land on **POS** — that is normal

Tip: Use landscape on a tablet. Pull down on most pages to refresh data.

Quick tour after login

POS

Walk-in sales at the counter

Chat

LINE / WhatsApp inbox

Reports

Sales summary

Bookings / Orders

Appointments (H&B) or Grab queue (F&B)

Profile menu (avatar) opens Overview, catalog, Rooms & staff, Settings, Account, and Resources.

Confirm shop details

- 1. Open the profile avatar → **Settings**
- 2. Check **Shop name** — edit if needed
- 3. Confirm the line under the name: **Country · currency** (example: TH · THB)
- 4. Save at the bottom of Settings when you change the name

Country and currency are controlled by BaseApp. Merchants cannot change country themselves.

Industry labels you will see

Shop type	Catalog name	Primary ops
Health & Beauty	Services	Bookings
Food & Beverage	Menu	Orders
Retail	Products	POS + Customers
General	Catalog	Bookings

Upload your catalog

The screenshot shows a mobile app interface for managing a service catalog. On the left is a dark sidebar with a 'Catalog' header and a list of menu items: Services (selected), Categories, Tags, Bookings, Customers, Staff, Payments, Reports, and Settings. The main area is divided into two panels. The left panel, titled 'Add New Service' with a yellow plus icon, contains a form with the following fields: 'Name' (text input with placeholder 'Enter service name'), 'Category' (dropdown menu with placeholder 'Select category'), 'Duration' (time picker set to 60 minutes), and 'Price' (text input with placeholder 'Enter price'). At the bottom of this panel are 'Cancel' and 'Add Service' buttons. The right panel, titled 'All Services', features a table with 8 rows of service data. Above the table are 'Filter' and 'Sort' buttons. The table columns are: #, Name, Category, Duration, Price, Status, and Actions. Each row includes an edit icon and a three-dot menu icon.

#	Name	Category	Duration	Price	Status	Actions
1	Haircut	Hair	45 min	\$25.00	Active	
2	Beard Trim	Grooming	30 min	\$15.00	Active	
3	Hair Coloring	Hair	90 min	\$75.00	Active	
4	Facial	Skincare	60 min	\$50.00	Active	
5	Manicure	Nails	45 min	\$30.00	Active	
6	Pedicure	Nails	60 min	\$35.00	Inactive	
7	Hot Oil Treatment	Hair	30 min	\$20.00	Active	
8	Head Massage	Wellness	30 min	\$25.00	Active	

Profile → **Services**, **Menu**, or **Products** (depends on shop type).

Health & Beauty

1. Tap into the add form
2. Name — e.g. *Small line tattoo*
3. Category — e.g. Tattoo, Treatments, Add-ons, Packages
4. Duration in minutes
5. Price in your shop currency
6. Deposit (optional — use 0 if none)
7. Save, then repeat

Food & Beverage

1. Add each menu item: name, category (Food / Drinks / ...), price
2. Optional: open **Customisations** for modifiers (ice, size, toppings)
3. Publish to Grab later from Settings after Grab is connected

Retail

1. Add products: name, category, price
2. Sell them from POS

Beta tip: Start with 5–15 items. Enough to train staff without delaying go-live.

Rooms & staff

1. Profile → **Rooms & staff**
2. Add at least one **Artist / therapist** (your name is fine)
3. Add a **Room / bay** if you use stations
4. These appear when creating bookings and on the day board

Skip this chapter for F&B and Retail shops.

Then create a practice booking

1. Open **Bookings** → **New**
2. Customer name + phone
3. Pick service, artist, room, start time
4. Create booking
5. On the day: mark paid / complete from the booking detail

Connect LINE Official Account

A. In LINE Developers

1. Open <https://developers.line.biz>
2. Select your provider → Messaging API channel (or create one)
3. Copy **Channel ID**, **Channel secret**, and a long-lived **Channel access token**
4. Webhook URL: <https://api.baseapp.asia/v1/webhooks/line>
5. Enable the webhook
6. Turn off conflicting auto-replies if BaseApp should own the chat

B. In BaseApp Settings

1. Profile → **Settings** → **LINE Messaging**
2. Paste Channel ID, secret, and access token
3. Optional: LIFF ID (booking also works by typing **menu** / **book**)
4. Tap **Save LINE only** (or save the full Settings form)
5. Confirm status shows token / secret on file

C. Smoke test

1. From a personal LINE account, add the shop OA
2. Send **menu** or **book**
3. You should get a package / booking flow
4. Open BaseApp → **Chat** — the conversation appears

Nothing arrives? Recheck webhook Enabled, URL exact match, and that ID/secret/token are from the same channel.

WhatsApp & Grab Food

WhatsApp (optional)

1. Settings → WhatsApp / Meta
2. Copy Callback URL, Flows endpoint, Verify token into Meta Developer → WhatsApp → Configuration
3. Subscribe to **messages**
4. Paste Display phone, Phone number ID, WABA ID, permanent access token into BaseApp
5. Save
6. Ask BaseApp to open your shop → Meta → **Publish booking Flow**

Webhook: `https://api.baseapp.asia/v1/webhooks/whatsapp`

Grab Food (F&B only)

1. Finish your Menu in BaseApp first
2. Settings → Grab → **Connect Grab**
3. Open the activation link and finish outlet linking
4. Paste Grab merchant ID if prompted
5. **Publish menu**
6. New orders appear under the **Orders** tab

Your first walk-in sale

- 1. Open **POS**
- 2. Tap catalog items into the ticket (adjust qty if needed)
- 3. Tap **Confirm order** / **Charge**
- 4. Choose customer or continue as walk-in
- 5. Pay with **Cash** or **QR**
- 6. Finish — optionally send a WhatsApp receipt if WA is connected

QR / pay links may be demo-style in beta unless BaseApp told you otherwise — still practice the full flow.

Day-to-day cheat sheet

Job	Go to
Sell at the counter	POS
Today’s appointments	Bookings
Reply to customers	Chat
Add prices / items	Profile → Services / Menu / Products
LINE / WhatsApp / Grab	Settings
Sales numbers	Reports
Download this booklet again	Resources

First-week checklist

- ☐ Signed in successfully
- ☐ Shop name looks right; currency matches country
- ☐ At least 5 catalog items added
- ☐ (H&B) At least 1 artist (+ room if needed)
- ☐ LINE connected + **menu** / **book** test works
- ☐ One POS cash sale completed
- ☐ (H&B) One manual booking created
- ☐ (Optional) WhatsApp saved + Flow published by BaseApp
- ☐ (F&B) Grab connected + menu published
- ☐ Language set for staff who use the tablet

Need help?

Reply to your BaseApp contact with a screenshot and what you tapped. Master Admin can also use **View as** to see your shop without your password.

Master Admin note: Provision shops under Vendors → Create vendor (industry + country + owner login), then send this booklet from Resources or as a PDF attachment.
